**Camp Directors' Trip Guide** is the only guide that helps camp directors, counselors and recreational center directors plan day, overnight and travel trips for campers.

' ... this volume represents one of the best works written to date on party organizational development in east central Europe and is essential reading for all political scientists interested in party politics in postcommunist systems.' - John T. Ishiyama, Slavonic Review Party Structure and Organization in East-Central Europe focuses on the origin and development of new political parties within different countries in East-Central Europe. The book has a clear focus on party structure and organization. It is one of the first books to present empirical studies of the development of political parties in Eastern Europe. Whilst making a distinctive contribution, it also feeds into the broader debate about party development and links with other issues of political theory.

A collection of workshop articles by The East-West Forum, located in Washington, D.C., and New York, a research and policy analysis organization sponsored by the Samuel Bronfman Foundation. The Forum aims to build a bridge between scholarship and policymaking. This volume holds the examination of perestroika against the history of the communist countries of Europe.

Comparative in structure and covering an extensive number of transition countries in its survey, this comprehensive book overviews the development of the banking systems in Central and Eastern European since the communist era until the present time. Taking in a range of countries including Hungary, Poland, Czech Republic, Slovakia, Bulgaria, Romania, Croatia, Russia, Ukraine, Belarus, Kazakhstan, Uzbekistan, Barisitz - an economist with the Central Bank of Austria - analyzes the evolution of legal foundations, banking supervision, banks ' major sources of assets, liabilities, earnings and related changes, banking crises, restructuring, rehabilitation programs, the role of foreign-owned banks and FDI. A significant publication, it is fascinating reading for all those studying and working in the areas of transition economy, macro and monetary economy and economic history

"A useful text and reference book. These essays are at their best in serving both area study and political sociology."—Slavic Review "Wolchik and Curry have assembled an all-star cast of experts for an authoritative assessment of the progress the region has made toward liberal democracy and a market economy in the last two decades. The book's particular strength is to cast the process in terms of a return to Europe. It thus pays attention not only to crucial developments in domestic politics but also to the influence of important international actors. Another exceptionally useful feature is the inclusion of essays that address important issues cross-nationally, as well as in-depth studies of each country individually, making the book especially valuable to students and scholars interested in the interaction between domestic issues and global political and economic forces."—Michael Bernhard, Pennsylvania State University "This is a straightforward and lucid overview of the paths taken away from communism by Central and East European states. The authors effectively address the domestic and international influences on the course of political development in the former communist states. The book is highly recommended to anyone who wants a clear picture of a complex and important region and its constituent parts."—Zvi Gitelman, University of Michigan Now in a fully updated edition, this essential text explores the other half of Europe, the new and future members of the EU along with the problems and potential they bring to the region and to the world stage. Clear and comprehensive, it offers an authoritative and up-to-date analysis of the transformations and realities in Central and Eastern Europe, the Baltics, and Ukraine. The book presents a set of comparative country case studies as well as thematic chapters on key issues, including European Union and NATO expansion, the economic transition and its social ramifications, the role of women, persistent problems of ethnicity and nationalism, and political reform. New to this edition is a chapter on Albania. For students and specialists alike, this book will be an invaluable resource on the newly democratizing states of Europe.

The resurgence of religiosity in post-communist Europe has been widely noted, but the full spectrum of religious practice in the diverse countries of Central and Eastern Europe has been effectively hidden behind the region's range of languages and cultures. This volume presents an overview of one of the most notable developments in the region, the rise of Pagan and "Native Faith" movements. Modern Pagan and Native Faith Movements in Central and Eastern Europe brings together scholars from across the region to present both systematic country overviews - of Armenia, Bulgaria, the Czech Republic, Hungary, Latvia, Lithuania, Poland, Romania, Russia, Slovenia, and Ukraine - as well as essays exploring specific themes such as racism and the internet. The volume will be of interest to scholars of new religious movements especially those looking for a more comprehensive picture of contemporary paganism beyond the English-speaking world.

"A biography of Isamu Noguchi, Japanese American artist, sculptor, and landscape architect, focusing on his boyhood in Japan, his mixed heritage, and his participation in designing and building a home that fused Eastern and Western influences.
