Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

'International Accounting' provides an overview of the broadly defined area of international accounting, focusing on the accounting issues related to international business activities and foreign operations.

International Accounting can be viewed in terms of accounting issues uniquely confronted by companies involved in international business. It also can be viewed more broadly as the study of how accounting is practiced in each and every country around the world, learning about and comparing the differences in various accounting methods. International Accounting, 2e is unique in its content and is up-to-date with relevant material integrated throughout the textbook. In its first year, this text captured approximately 30% of the market.

business activities and foreign operations.

Financial reporting practices differ widely between countries and this has far-reaching implications for multinational businesses. Over more than a century, there have been attempts to classify countries into groups by similarities of practices. With the recent spread of International Financial Reporting Standards, it might appear that classification is largely of historical interest, but this is not the case, for several reasons explained in this book. Christopher Nobes offers a critical analysis of the many previous accounting classifications, having drawn lessons from other fields of science and social science. Revised and updated to reflect the IFRS era, the book discusses how old classifications are reflected in today's international differences in practice under IFRS. It concludes with a discussion on the most useful classifications, and how classifications can still be relevant in the era of international standards. This book will be essential for academics, postgraduates and undergraduates in international accounting, accounting theory and to international accounting professionals.

The approach used by Hoyle, Schaefer, and Doupnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been

highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Revised edition of the authors' Finance.

Written by two experienced lecturers, this is the first student-centered textbook to bridge the technical and theoretical aspects of management accounting change. Packed full of pedagogical features, including mini-cases, learning outcomes, key terms, article summaries, key concept boxes, real-world cases, chapter summaries and further reading suggestions and resources, it is clear and accessibly written, covering all the major emerging topics in management accounting theory. Discussing technical developments in management accounting from conventional cost accounting to contemporary strategic management accounting and beyond, in four parts it: shows how conventional cost accounting techniques and management control models evolved in line with the development of mass production and bureaucracy explores how recent developments such as customer and strategic orientations in business, flexible manufacturing, post-bureaucracy, network and virtual organizational technologies implicate in management accounting provides a number of alternative theories through which the transition of management accounting from mechanistic to post-mechanistic approaches can be explained – elaborating both rational and interpretive/critical theories.
