IDM Tool Kit measures distances in vertical direction to any metal surface with a high accuracy Measuring Principle. Inductive sensors use the physical effect of the change of quality of a resonance circuit, which is caused by eddy current losses in leading materials. A LC-resonant circuit produces a high frequency alternating field. This field withdraws at the active surface of the sensor. If ...

It ' s very simple, this tool is the link between the Navigation system and the R-Link Store. The GSM connection of the car can download little update but for all the other the R-Link toolbox is mandatory. First of all, you have to make an imprint of your system in your vehicle by inserting a blank USB key for one minute in your vehicle.
